- *Schools & Universities*
- *Military locations*
- *Convention Trade Centers*
- *Ski Hills*
- *Golf Courses*
- *Concession Stands*
- *Mall & Trade Kiosks*
- *Portable Safety Units.*

These sinks are custom made but the size can be varied. The standard sink is 31" by 29" & 37" tall. They are suitable and used in a variety of Health, Safety and Concession Service environments.

There are three basic power configurations:

- **Electric** – *requires an 120 VAC outlet for the water heater & pump*
- **Propane** – *requires no outside power source. The water heater is heated by an external 20lb propane tank. The water pump is run from a rechargeable 12VDC battery. (Charger is included and mounted internally).*
- **Combination** – *the water heater is a combination electric/propane model and water pump is run from a rechargeable 12VDC battery. (Charger is included and mounted internally)*
